Средства для мойки и депарафинизации двигателей

ENGINE WASHING - RAPID X3

Engine wash and de-waxer

016RAX3TN20

The removal of greasy and oily substances from engines and mechanical parts can prove difficult, if not with the right product. RAPID X3 is a concentrated water-based liquid product, for the cleaning of the engine block and compartment. A formula free from hydrocarbon solvents, non-flammable, characterised by a high level of biodegradability and low toxicity. Safe to use and easy to rinse.

It is advisable to not allow the product to dry on painted surfaces. Use when possible in the shade.

ENGINE WASHING - RAPID

Engine wash and de-waxer

016RAPD0010

The removal of greasy and oily substances from engines and mechanical parts can prove difficult, if not with the right product. RAPID is a blend of hydrocarbons which is ideal for the cleaning and degreasing of engines and mechanical parts. It is ideal for use in the automotive sector and for industry in general. The combination of solvents and surfactants renders the product easy to rinse with water and gives it highly-emulsifying properties. RAPID is also an excellent de-waxer for paraffin waxes.

ENGINE WASHING - NEOS ECO WAX

ECOLOGICAL WAX FOR VEHICLES DRYING IN CARWASH plants

016NEEWTN25

NEOS ECO WAX is a drying vehicle wax, completely ecological and oils and greases free. Despite being an ecological formulation, this wax ensures the same shining performances than traditional ones can perform. It creates a protecting film on all external surfaces, making them hydrophobic and water repellent. Excellent performances are ensured both on soft, hard and recycled waters as well. Thanks to its high concentration, Neos Eco Wax acts effectively at very low dosages (between 8 and 15 g/L), optimizing consumption and costs. Moreover, drying times are notably reduced, facilitating this way operators' work, when the product is applied manually. Ensures: - ultra polished glossy effect - non-greasy; - shining mirror effect; - dirt and weathering shield effect. It does not grease glasses nor brushes of the carwash station.

Do not exceed in dosage: this wax works at low grammages, if overset it could not ensure great performances.

ENGINE WASHING - ALL BACTI POLVERE

Bacterial additive for biological wastewater treatment plant 016ABAP0500

ALL BACTI POLVERE is a mixture appositely formulated to treat the wastewaters in carwash biological purifier and to reactivate the bio-filters. The mixture of bacterial strains and nutrients contained in ALL BACTI POLVERE guarantees a wide action spectrum, quick acclimatization in the system, safety, compatibility with the present biomasses and a maximum efficiency on all kind of biological plant and relative ecosystem. ALL BACTI POLVERE degrades surfactants and hydrocarbons, and has a synergic action on most of pollutant present. Once dosed in the biological oxidation tank, it revitalizes the autochthon bacterial masses, reactivating the depuration process, reducing bad smells. ALL BACTI POLVERE can be used both in aerobic and anaerobic conditions with optimal results, favoring the start of new plants, improving the purifying capacity and efficiency of the plant. It controls bad smells minimizing the consequent effects due to a charge hike and the presence of bio-toxic substances. It is ideal for the treatment of purifier plants, vegetal fibre bio-filters, fiber bio-filters, bio-rolls.

We suggest the utilization of ALL BACTI POLVERE to maintain the efficiency of the plant. It can be used in combination with ALL NUTRI BACTI and ALL BACTI DEO.

ENGINE WASHING - ALL NUTRI BACTI

Biomasses organic stimulator and odour neutralizer

016ANUB0005

ALL NUTRI BACTI is a brown and sweet-odour liquid product, made of natural organic mixture extracted from vegetal and soluble of the Yucca Schidigera tree and marine algae. ALL NUTRI BACTI has an efficient application in bio-purification for the stimulating activity in bacteria growing in oxidation tank and reducing wastewater odours. ALL NUTRI BACTI is a safe and natural product, based on Yucca Schidigera, vitamins, minerals and agaes: it is harmless for human and environment. It does not contain GMO. Ready to use, it is a valid and cheap complement to the traditional chemical nourishments (N, P and K). It is also efficient on a wide range of molecules at high olfactory impact generated by wastewaters, active muds and percolates. It works with pH and temperature extreme for the biological life as well. It guarantees a quick and optimal bacterial development for the restart of plants, in particular way: stimulates the biomasses biological biomasses activity already present in the plants and increases the microorganisms resistency to environment solicitation and charge variations.

Used with ALL DEO BACTI and ALL BACTI POLVERE during inactivity periods of the carwash, it optimizes the functioning and stability of the biological purifier.

ENGINE WASHING - ALL BACTI DEO

Bacterial and odour-neutralizing additive for biological wastewater treatment plants

016ABAD0005

ALL BACTI DEO is a mixture appositely formulated to treat the wastewaters in carwash biological purifier and to reactivate the bio-filters. The mixture of bacterial strains and nutrients contained in ALL BACTI DEO guarantees a wide action spectrum, quick acclimatization in the system, safety, compatibility with the present biomasses and a maximum efficiency. The odour-neutralizing agent reduces and drastically eliminates bad smells in the purifier and exhaust pipes. ALL BACTI DEO degrades surfactants and hydrocarbons, and has a synergic action on most of pollutant present. Once dosed in the biological oxidation tank, it revitalizes the autochthon bacterial masses, reactivating the depuration process, reducing bad smells. It improves the purifying capacity and efficiency of the plant. ALL BACTI DEO is harmless for human and environment. The bacterias contained are carefully selectioned between natural and not genetically modified bacterial strains, and none classified as pathogen.

The concentrate is a mixture of “asleep” spores that activates if diluted. Use it regularly to ensure the best performances. Suitable for all chemical baths.

ENGINE WASHING - NEOS ACTIVE FOAM

Alkaline detergent for the foaming washing of vehicles

016NEAFTN25

NEOS ACTIVE FOAM is a detergent with high foaming power for car washing. Thanks to its special active foam formulation, it can remove soil, greasy and static dirt (as traffic film) without sponges or brushes. The active foam keep anchored for long time on the surfaces of the car, consenting a superior cleaning action for excellent results. Moreover, creates an antistatic and superpolished film that confers shine and glow to the car surfaces. During the rinsing phase the product does not make further foam, easing the rinsing and preparing the car to the following washing phases. NEOS ACTIVE FOAM works at lower grammages than the average ones used in traditional carwashes. It can be used in all foaming plants, as the waterfall And traditional arch, and it is ideal to emphasize the scenographic effect in the prewash phase. The product ensures optimal performances with medium-hard water as well.

Do not exceed with dosages. Do not let the product dry on the bodywork. In case of overheated surfaces, it is suggested to wait until they cool down.

ENGINE WASHING - NEOS ACTIVE FOAM FRIZZ

Scented alkaline detergent for the foaming washing of vehicles

016NEFFTN25

NEOS ACTIVE FOAM FRIZZ is a detergent with high foaming power for car washing. Thanks to its special active foam formulation, it can remove soil, greasy and static dirt (as traffic film) without sponges or brushes. The active foam keep

anchored for long time on the surfaces of the car, consenting a superior cleaning action for excellent results. During the nebulization, it releases in the air a pleasant and long-lasting/persistent clean scent. Moreover, creates an antistatic and superpolished film that confers shine and glow to the car surfaces. During the rinsing phase, the product does not make further foam, easing the rinsing and preparing the car to the following washing phases. NEOS ACTIVE FOAM FRIZZ works at lower grammages than the average ones used in traditional carwashes. It can be used in all foaming plants, as the waterfall and traditional arch, and it is ideal to emphasize the scenographic effect in the prewash phase. The product ensures optimal performances with medium-hard water as well.
