Моющие средства для колес и дисков

CIRCLES DETERGENT - D 33

Descaling deoxidising detergent

016D300TN25

D 33 is a descaling deoxidising detergent for painted surfaces and surfaces in aluminium. Ideal for the cleaning of heavy vehicles, train carriages, trucks and underground trains. Particularly suitable for the removal of stubborn dirt, traces of oxidation and drips. Leaves traditional and light alloy wheels clean and sparkling. Also ideal for the cleaning of stainless steel. ATTENTION: It is recommended to nebulize the product only through PVC nebulizers. The use of steel or iron may cause the explosion.

May stain glass. Considering the variety of aluminium alloys it is advisable to test the product in order to determine the ideal dilution and avoid eventual damage.

CIRCLES DETERGENT - DETERGENTE CERCHI LEGA 05

Alkaline detergent for the cleaning of wheels

016DECLTN20

An alkaline detergent formulated for the cleaning of traditional and light alloy car wheels. Easily and completely removes brake pad residue and all kinds of dirt in general.

Do not use the product neat and avoid long periods of contact of concentrated solutions on aluminium and light alloys. Do not spray concentrated solutions onto painted surfaces.

CIRCLES DETERGENT - CROMOBEL

Acid detergent and rust remover for alloy wheels

016CROM0025

Residues of rust and lime scale can cause the oxidation of metal surfaces. CROMOBEL is a liquid detergent formulated to eliminate stains and traces of oxidation from metal surfaces, particularly from chrome damaged by the emergence of rust. An excellent immersion rust-remover for particularly oxidised ferrous parts. Ideal for the car wash sector in general.

For normal use, the product can be diluted with water. Basins and vessels containing CROMOBEL should either be treated internally with anti-acid varnishes or plasticised.

CIRCLES DETERGENT - TEKNOLEGA

Alkaline detergent for the cleaning of wheels

016TKLETN20

Highly concentrated products allow for the optimisation of costs through their dilution. TEKNOLEGA is an alkaline detergent which responds to these requirements, formulated for the cleaning of traditional and light alloy car wheels. The special additives with elevated dispersive and anti-settling properties allow for perfect cleaning of dirt typically found on the wheels of vehicles, restoring them to their original splendour.

Do not use the product neat and avoid long periods of contact of concentrated solutions on aluminium and light alloys. Do not spray concentrated solutions on to painted surfaces.

CIRCLES DETERGENT - PULICERCHI -18

Detergent for wheels with a freeze point of -18°C

016PULCTN20

With the arrival of the winter period, the removal of dirt from alloy wheels becomes more difficult than during the summer. PULICERCHI -18 is the ideal product as its characteristics mean that it can be used in temperatures as low as -18°C. A product formulated for alloy wheels for the complete removal of residues from brake linings and pads, as well as dirt from smog and traffic. The product contains special additives which permit a freezing point of -18°C.

Ideal for use in self-service bays during winter months. Do not spray onto car body work. Not to be mixed with water. To be used exclusively with direct drawing systems with air pumps; use the product neat. Do not allow the product to dry on surfaces.

CIRCLES DETERGENT - RUOTALL LEGA PLUS

Alkaline detergent for the cleaning of traditional and alloy wheels

O16RULPTN20

RUOTALL LEGA PLUS is an alkaline detergent specifically formulated for the cleaning of traditional and light alloy car wheels. Easily and completely removes brake pad residue and all kinds of dirt in general.

Do not use on motorbike wheels. Do not spray concentrated solutions on to painted surfaces.
