ЭНЗИМЫ

ЭНЗИМЫ - ENZIMALL

Bacterial additive and odour eliminator

016ENZI0020

Drains partially blocked by organic residue, unpleasant odours and stagnant water are some of the problems encountered in any activity linked to the Ho.Re.Ca sector, as well as others. ENZIMALL is a new concept formula, capable of fluidising and breaking down all organic substances, instantly eliminating unpleasant odours. It is made up of a special blend of natural vegetable extracts and sporogenous bacteria strains which product natural enzymes guaranteeing a wide range of actions, rapid action, safety and the highest levels of efficiency for a very wide range of systems. It is harmless both to humans and the environment. ENZIMALL is very effective in both aerobic and anaerobic environments, on surfaces, in wells and pipes. On distribution, it captures and neutralises the molecules responsible for unpleasant odours, and neutralises them, leaving the air clean and odourless, while at the same time breaking down oil, and animal and vegetable fats, and has a fluidising effect on the majority of flows. ENZIMALL is indicated for the treatment of refuse containers, refuse collection centres, sewers, cess-pools, septic tanks, drains, vehicles, compactors, purifying plants, floors, grating cleaners, refuse containers, RSU storage tanks, bilge tanks.

The concentrate is a blend of “dormant” spores which is activated on dilution: do not use neat. Use regularly to guarantee the best results. It can also be used in all types of chemical toilets and in campers.

ЭНЗИМЫ - ENZIMALL (per tank e serbatoi)

ENZIMALL TANK is a formulated for dissolving encrustations of organic matter deposited inside the wastewater tanks of washing machines, acting even on bad smells that derive from it. The bacterial strains and enzymes contained in ENZIMALL TANK guarantee a broad spectrum of action, rapidity of acclimatization, safety, compatibility, maximum effectiveness and speed action in a huge variety of systems. ENZIMALL TANK degrades all organic substances present, surfactant residues, oils, animal and vegetable fats. Once dosed in the tank, it fluidize most of the stubborn encrustations and degrades the organic substances that causes bad smells. It can be used in both aerobic and anaerobic environments with excellent results. It counteracts the growth of all pathogenic bacteria. It is indicated for the treatment of dirt deposits on the bottom of the machine wastewater tanks: floor cleaners, scrubbers, carpet cleaner, stairs washers. It is a ready-to-use liquid and it is completed with nutrients for the immediate activation of microorganisms. The bacteria used comes from a careful selection of natural strains, genetically unmodified. The raw materials of which it is composed are completely zero-impact biodegradable. It is harmless to humans, animals and environment.

ENZYMATIC BACTERIAL ADDITIVE FOR THE CLEANING OF WASHING MACHINES TANKS
